

**Specialist provider of Portable and Medical Oxygen Solutions**

## **ABOUT US**

In the 1990's, the Pure O2 Group concept was developed with a primary view to provide oxygen solutions to suit all needs globally. Since then the group has been at the forefront in providing the latest in technology and pioneering oxygen services to another level. The Group has built up innovative divisions within the medical industry, sports, commercial, health and wellness sectors.

The Pure O2 Group have a proud reputation of providing only the best service to our customers and to date, we have not received one negative comment about the way we conduct our business, the professionalism of our staff, the pre and after sales service we provide and the on going warranties that we honour with pride! Our motto is simple: No enquiry is too small and no customer less important than another. Each deserves our utmost attention and when you buy from us we are with you for life!

The POC (Portable Oxygen Company) was formed using the vast resources of the Pure O2 Group with one dedicated vision in mind: To provide the best portable products and service to Medical Oxygen patients within the United Kingdom. POC provide only the latest and finest portable oxygen concentrators in the world. Some weigh as little 2kg, whilst others can provide continuous oxygen with great safety back up measures. Right from an initial patient or hospital enquiry, the POC staff will come to demonstrate the complete product line and more importantly, perform an in-depth medical assessment, to determine which product is suitable.
